

# COMMUNITY ENGAGEMENT AND VALUE BASED CARE

## NETWORKING

Exchanging information for mutual benefit

## COORDINATION

Exchanging information, altering activities and sharing resources such as knowledge, staffing and space for mutual awareness

## COOPERATION

Sharing resources in support of activities for mutual benefit and common purpose

## COLLABORATION

Exchanging information, altering activities, sharing resources and working together to mutually enhance community capacity and impact

## WHO IS INVOLVED?

## WHAT IS COMMUNITY ENGAGEMENT (CE)?

An *intentional* approach to working *collaboratively* with partners and people in the community to address issues and improve health

## BENEFITS

- Increased use of the right care at the right time in the right place
- Strengthened partnerships that improve health by addressing social drivers
- Coordinated services that support patients and care givers
- Improved trust and use of local health care services in the market

## WHAT DOES THIS MEAN FOR VALUE BASED CARE?

Emphasize prevention and wellness, in addition to treatment

Integrate and coordinate care

**EFFECTIVE VALUE BASED CARE SHOULD**

Help patients address their Social Drivers of health

Focus on improving outcomes

Help patients navigate the healthcare system

## WHY?

Meaningful involvement ensures sustainable change which improves the health and well-being of people.

Equitable transformation can only happen when communities are meaningfully engaged and are able to share power with decision makers.

FACILITATING POWER. THE SPECTRUM OF COMMUNITY ENGAGEMENT TO OWNERSHIP. 2020.
